✓ Included service.

More information about your health cover

Who is Working Visa Hospital and Medical for?

Most overseas visitors are not covered under the Australian Government's Medicare program. HBF's Working Visa Hospital and Medical cover provides health insurance for anyone living or staying in Australia for an extended period.

If you're a visitor from a country Australia doesn't have a reciprocal healthcare agreement with, you won't be eligible for health cover under Medicare Australia. This means you'll have to pay for any medical treatment you may need while in Australia – from a simple doctor's visit to major surgery.

It is very important to contact Medicare Australia to clarify what Medicare benefits you are covered for, so you can choose an appropriate private health cover policy.

Please contact Medicare Australia via medicareaustralia.gov.au or call 132 011.

Even if you are eligible for Medicare, if you don't have private health cover you'll still need to pay for:

- Treatment in a private hospital
- Treatment as a private patient in a public hospital

If your circumstances change or you become eligible for Medicare benefits please notify us immediately.

When can I claim?

Waiting periods will apply if you're new to private health insurance or if you've upgraded to a higher level of cover. If you have transferred from another Australian registered health fund, we may honour the waiting periods that you've served so you won't need to re-serve them.

Waiting periods for Working Visa Hospital and Medical are listed below:

Service	Waiting periods
Pre-existing ailments or conditions [^]	12 months
Pregnancy and birth	
Rehabilitation, Hospital psychiatric services and Palliative care	2 months
Other hospital treatments including surgery	1 day*
Other medical treatment not provided at a hospital	
Ambulance cover for urgent ambulance transport	No waiting period

Excess waiting periods

Waiting periods apply when your level of excess is reduced. The waiting period for a lower excess, depends on the service being claimed and aligns to the waiting periods set out above e.g. 12 months for pre-existing conditions.

[^] Pre-existing waiting periods do not apply for hospital psychiatric services rehabilitation or palliative care.

* You cannot claim for any treatment received on the day you join.

Where you have continuous hospital cover, we'll honour any waiting periods you served on your previous health cover, so you won't have to re-serve them. If you are part-way through a waiting period, you will just have to serve the remainder before you can claim.

If there are new services on this cover, that were not on your previous cover, you will have to serve the relevant waiting periods for those services before you can claim any benefits.

If there are higher benefits on this cover compared to your previous cover, you will have to serve the relevant waiting periods before you can claim the increased benefits.

What is a pre-existing condition and how does it work?

This is an illness or condition which, in the opinion of an independent medical practitioner (appointed by HBF), was known to exist, or where signs or symptoms were evident during the six month period before you became an HBF member, including on the day you join. This also applies if you transferred to a level of cover with higher benefits or reduce your excess level. If you proceed with a hospital admission without confirming what benefits you're eligible for and your condition is determined to be pre-existing, you will be required to pay all outstanding hospital and medical charges.

Are there any exclusions on benefits?

There are some common situations where HBF won't pay a benefit for any hospital treatment fees including accommodation, medical or theatre fees:

- If you receive treatment that is excluded on your cover or is not eligible for a Medicare benefit.
- If you receive treatment which is deemed to be cosmetic and not medically necessary.
- If your premium payments are not up-to-date at the time of treatment.
- If your claim is covered by worker's compensation, third party or other legal right.
- For treatment or services required by your employer or potential employer to be provided to you as a condition of your employment or by your insurer as a condition of your policy.
- For treatment or services provided outside of Australia.
- For care and accommodation in nursing homes.
- If you have not yet received your treatment at the time you claim.
- If a claim is not lodged within two years of the date of service.
- For treatment arranged in advance of your arrival in Australia.

What is an included service?

When you have been admitted to hospital for treatment that is an included service on your cover, you'll be covered for a single or shared room accommodation and theatre fees for all agreed services in any hospital in Australia. We may also pay a benefit towards your specialist fees and other in-hospital services, such as medically necessary investigative tests and/or examinations, if your treatment would be covered by Medicare for Australian residents. These services must be required to support your treatment after you've been admitted to hospital.

What is a restricted service?

When you have been admitted to hospital for treatment that is a restricted service on your cover, we'll pay a benefit which is limited to the minimum default benefit. This means we'll cover the same amount as the cost of receiving treatment at a public hospital, staying in a shared room. If you choose to receive treatment for a restricted service at a private hospital, you'll have to pay any differences, which means paying a large portion of your treatment costs out of your own pocket.

The Medicare Levy Surcharge

It is important to note that Working Visa Hospital and Medical cover will not make the policy holders exempt from the Medicare Levy Surcharge (MLS). The MLS is a Government surcharge charged through the tax returns of people without eligible private hospital cover earning above a certain income.

HBF Member Plus hospitals

HBF Member Plus hospitals provide great value for our members. With HBF Working Visa Hospital and Medical, you'll be fully covered for single or shared room accommodation and theatre fees on covered services in any hospital in Australia. However if you visit a Member Plus hospital you will also have access to our hospital boarders service.

To find a Member Plus hospital visit
hbf.com.au/health-insurance/find-a-provider

Hospital boarders

If you need someone to stay with you while you're in hospital, we will fully cover the charge for a hospital boarder where it is an agreed service, and their presence is integral for the management of your condition. Costs covered include accommodation and meals in your room.

Pharmacy benefits

Pharmacy benefits while in hospital

When you're admitted to hospital, it's likely you'll be given medication. We'll pay a benefit for medication you receive for treatment covered on your policy. HBF will fully cover the cost of an Pharmaceutical Benefit Scheme (PBS) medications you receive while admitted to hospital less the cost of a co-payment per script. There is no limit on the number of times or the amount you can claim per year.

HBF will fully cover any non-PBS pharmaceuticals you receive while a patient in hospital, up to \$2000 per person, per year. Please note that these pharmaceuticals must be approved by the Therapeutic Goods Administration and not used on an experimental basis.

Pharmacy benefits outside of hospital

When you have pharmaceuticals prescribed outside of hospital by a medical practitioner that are normally covered by the Government's PBS for Australian residents, HBF will pay a benefit up to \$600 per person, per calendar year. Depending on the pharmaceuticals prescribed, you may need to pay a co-payment per script.

You won't receive a benefit for non-PBS pharmaceutical outside of hospital. If you would like cover for this service please refer to our Extras health covers.

Medical

HBF pays benefits towards two types of medical fees:

- Out-of-hospital medical fees (such as a visit to a general practitioner)
- In-hospital medical fees (such as surgeon's fees)

Out-of-hospital medical fees

Includes treatment from a medical practitioner that would be covered by Medicare for Australian residents, when you're not admitted into a hospital or day-hospital facility. This also includes visits to your specialist before or after you're admitted to hospital for any treatment or surgery.

Working Visa Hospital and Medical cover provides a benefit of 85% to 100% of the Medicare Benefits Schedule (MBS) fee.

In-hospital medical fees

Includes treatment by doctors, specialists, surgeons, anaesthetists, radiographers and pathologists when you are admitted to a hospital or day-hospital facility.

If your doctor/s (e.g. your surgeon, specialist or anaesthetist) charges more than the Medicare Benefits Schedule (MBS) fee, there'll be a 'gap' that needs to be paid. HBF may cover all, some or none of this gap, depending on the agreement the doctor has chosen to participate in. Doctors outside of WA can choose to participate in agreements with HBF on a case by case basis. No benefit will be payable for doctors fees if the treatment category is excluded on your level of cover.

You should always speak to your doctor/s prior to your procedure to check what arrangement they have with HBF and what, if any, gap you'll have to pay. Contact us for more information and for a list of fully covered doctors.

Urgent Ambulance

With Urgent Ambulance, you'll be fully covered for ambulance transport by road or air and on-site treatment, for circumstances classified as emergency or urgent provided by an approved HBF provider.

The most common urgent ambulance service is a call-out that requires a trip to a hospital emergency department. Emergency or urgent treatment by paramedics at the scene, such as resuscitation, are also considered an urgent ambulance service and will therefore be eligible for benefit under your cover.

HBF won't pay a benefit for:

- Situations where the service is not classified as emergency or urgent and you are not transported to, and received by, an emergency department, including transport to medical appointments.
- Any transport not by road or air.
- Situations where the benefit or cost is subsidised by a state scheme or is payable by a third party, including inter-hospital transfers.

Medical Devices and Human Tissue Products

Medical devices and human tissue products, such as pacemakers and artificial joints, are items that may be provided during hospital treatment. HBF will only pay a benefit towards items that are listed on the federal government-prescribed list. If your doctor uses an item that isn't listed on the prescribed list, HBF will not pay a benefit and you'll have an out-of-pocket expense.

How to manage out of pocket costs: We suggest you discuss the choice of medical device or product and the associated costs with your doctor prior to receiving any treatment.

Dental surgery

Where your Dental surgery treatment would not be covered by Medicare for an Australian resident, HBF won't pay a benefit for the oral surgeon's fees under your hospital cover, however you'll still be covered for the accommodation and theatre fees.

You may be able to receive a benefit for these treatments if you hold an eligible Extras cover and waiting periods have been served. Contact us before your treatment to understand what out-of-pocket costs will apply and any benefits you may be able to receive with one of our Extras covers.

Podiatric surgery

Where Podiatric surgery is an included service on your hospital cover, limited benefits will apply. This means that HBF will pay a benefit towards accommodation and theatre fees associated with Podiatric surgery. HBF may pay a benefit towards the anaesthetist and/or a podiatric surgeon, however you will incur out-of-pocket costs. To receive a benefit, your treatment must be provided by a HBF approved podiatric surgeon at a hospital where Podiatric surgery is an agreed service.

Call us before treatment to understand your level of cover and the out-of-pocket expenses that may be incurred.

If podiatric services are provided in a clinic, they are considered outpatient services. As these services are not typically covered by Medicare for an Australian resident, you will have to pay the bill yourself unless you have Extras cover which includes those services.

Weight loss surgery

The Weight loss surgery Hospital treatment category provides cover for surgery designed to reduce a person's weight, reversal of a weight loss procedure and removal of excess skin due to any form of weight loss, including gastric banding, gastric bypass and sleeve gastrectomy. Treatments which fall under this category are often required due to a pre-existing condition, in which case the pre-existing waiting period may apply.

Before receiving any treatment, you should contact us or go to [hbf.com.au/myhbf](https://www.hbf.com.au/myhbf) for a health benefit quote so you know how much you're covered for, the benefits you'll receive and any out-of-pocket expenses.

HBF reserves the right to make changes to its products, benefits and terms and conditions from time to time. HBF will notify the policyholder a reasonable time in advance of any changes that might be detrimental to the member's interests.
